Read the following passage and choose the best answer :

Has any student heard or read about flying? Flaying an aircraft was unbelievable and <u>dangerous</u> to many people someday. The two brothers who invented the first flying matches were Wilbur and Ville Wright. They were very ambitious and their desire was to succeed and continued their experiments in <u>aviation</u>. They got benefits from others' mistakes in flying and searched for sufficient methods in order to control the balance of the aircraft during flying. The wrights tried to examine several <u>gliders</u> and developed control techniques in 1900 but the brothers' inability to obtain enough lift power for the gliders almost led them to abandon their efforts. They didn't stop their study and began a series of experiments with model wings.

As a result , this step encouraged them to <u>design</u> a machine that would fly. The first airplane was built in 1903 whose price was less than one thousand US dollars. They ever designed and built their gasoline engine . The airplane vibrated widely before taking off when they started the engine . The plane managed to stay in the air for first twelve seconds and then flew one hundred twenty feet . The perfect airplane was made in 1905 by the Wrights. The Wright brothers are accurately called the father of aviation because of the most <u>outstanding</u> engineering achievements in the history.

1-Wright brothers were..... to succeed in aviation. a)lazy b)hopeless c)hopeful d) careless 2-One of their most success was a)they tried several times **b)** not repeating the same mistakes of others c)buy new and valuable materials d) insufficient methods 3-The wright brothers were a) inventors b) technicians c)pilots d)mechanics 4-The best title for this article would be a) The Aircraft's interests of wrights b) flying on the airplane c) The Wright brothers experiments d) The invention of the first flying airplane 5-The best airplane was built in c)1905 a)1900 b)1901 d)1903 6-gliders means : a)engineless aircrafts b)balloons c)planes d)military aircrafts 7-design means: a)made b)perform c)draw a plan d) type 8-aviation is related to: a)ship b)military rockets c)science of flying d)civil engineering 9-<u>outstanding</u> : a)very b) not well c)extremely good d)neither good nor bad d)perfect 10 –<u>dangerous</u> means : a)safe b)peaceful c)unsafe
