

النموذج (B)

اختبار القبول للعام الجامعي 2020 - 2021م

Read the following questions carefully. Then answer them by shading the correct answer on the answer sheet.

Part one: Read the following passage, and then answer the questions below.

Internet is a global network of computers linked together by different means of communication. It is used for sending letters, chatting with people electronically or searching for information. It was originated in the 1960s, when the U.S. Defense Department was worried about having its computer network destroyed by blowing up the central computer. In the 1980s, it was mainly used by commercial organization and education. The rapid development of technology has been improvement in communication links and lowering of costs. Internet has become a very important communication for human kind and for any country's development, i.e. through its capability for worldwide delivery. Internet connects people in their trades, business and works; it is the cheapest and the fastest communication tool between person-to-person, business-to-business and community-to-community. In addition, Internet offers a lot of services, such as the World Wide Web (WWW); email: for sending and receiving messages; and chatting: live conversation between users on the Internet.
